

WB-GYP GYPSUM PANEL ACCESS DOOR

The WB-GYP Gypsum Panel Access Door is a state-of-the-art lightweight gypsum panel manufactured from inorganic material and 70% post-consumer recycled glass, using a patented composition. It is designed to blend seamlessly into walls and ceilings. Lightweight and easily textured, the panels can be used in both new or retrofit construction across unlimited applications. It is available in a pop-out or concealed hinged design with square or radius corners. It is moisture resistant with zero mold and fungus growth.
